

# Rip CD

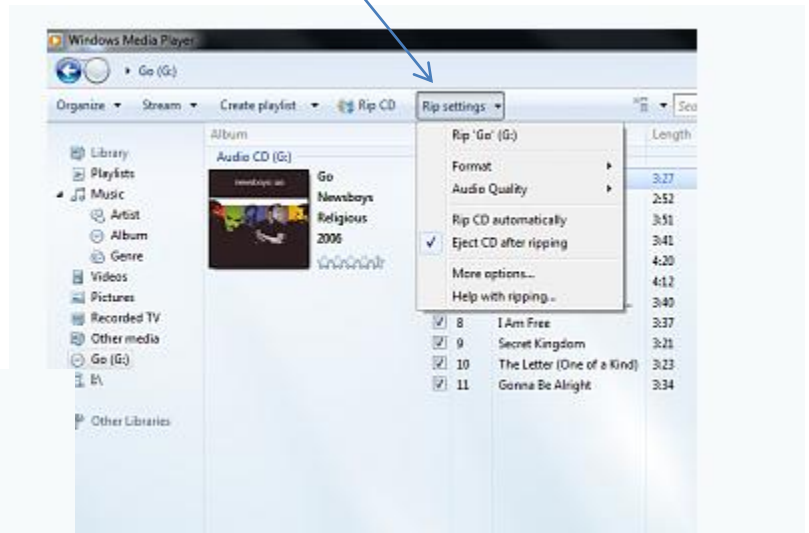

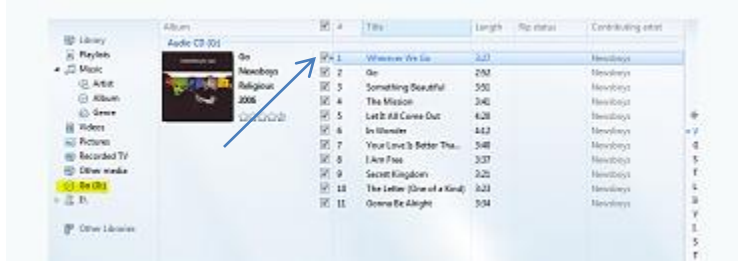

Ripping a Cd is transferring content on a hard disk to your computer. To rip a CD you first need to find the music you want to rip. Then you need windows media player to copy the song.

1. Insert your disc into your computer

2. Access windows media player, and select rip music.

3. Select the cd and change the settings

4. Click on rip

5. Wait until done and you have successfully ripped a CD.
